

**ARAKO**  
A PIECE OF NATURE

## OUR STORY

As a family company we started our activity in 2013 and spent many years exporting dates, one of the most unique products of Iran and the Middle East to many countries including UAE, Qatar, Oman, Bahrain, Kuwait, India, Russia, Armenia, Iraq, Indonesia, Malaysia, Turkmenistan, etc.

In 2018, after many surveys and researches on consumer behavior, we found that one of the most common causes of various diseases is the consumption of unhealthy foods and artificial sugars. Also our findings showed that due to the high price of natural and organic products, a few people have access to these products. Therefore, as a family company, we decided to supply all kinds of natural sweeteners (dates-based) so that all members of the society have access to healthy sweet products.

After doing some necessary microbial and chemical tests and evaluating the nutritional value of each product, finally with a wealth of knowledge and experience, our healthy-natural sweeteners were produced by using advanced equipment according to global standards in the field of health and environment. Now, in line with our goal, we provide the products that are used both as a raw material in food factories and as a final product in chain stores. We are trying to take a new step in encouraging people to consume healthy and natural sweets in order to reducing the incidence of diseases such as diabetes.

## DESCRIPTION

Date Paste which has become quite popular in recent years is a natural sweetener prepared from the best dates without seeds, additives and preservatives. Also other natural ingredients such as sesame, hazelnut, pistachio, almond, walnut, etc. can be added to give it a different taste.

## WHY DATE PASTE ?

Filling of biscuits, cakes, croissant, pastries and other baked goods.

Complementary for breakfast or evening snack, before gym, after training, etc.

The best choice for beverage factories to make alcoholic beverage.

A delicious ingredient for Tahini, baby foods, healthy snacks, cupcakes, energy bars and fruit bars.

- Containing all vitamins and nutrients of date fruit

## PACKING

It could be provided in bulk size (250 KG), bucket size (25 KG) and sachet (10-20 Grams) or any other packing according to customer's demand and design.

## DESCRIPTION

Date liquid sugar as a refined syrup is made by processing the high quality, premium and fresh dates. This sweetener is a refined mixture of beneficial fructose and glucose. So it has a commercial competition with other natural sweeteners such as honey and given all this, it can be a good substitute for sucrose sugar.

## WHY DATE LIQUID SUGAR?

Natural sweetener in beverages industry (Cola, Soda, Coffee, Tea, etc.)

A healthy sweetener for preparing jams, chocolates, juices, Nectars , marmalades, candies, etc.

Using in pharmaceutical industry as a sweetener for medicinal syrups.

Sweetener raw material for factories producing Daily Soft Drinks, isotonic, energetic and sports drinks.

## DESCRIPTION

Date Coffee Powder is made from raw roasted seeds. They are grinded according to a standard size by strong grinders to prepare an aromatic super coffee.

Date seed coffee with its high nutritional value could be a healthy and non-caffeinated substitute for coffee and tea.

## WHY DATE SEED COFFEE ?

As a traditional brewed coffee replacement.

A great choice to mix with spices as Arabic coffee.

Suitable for biscuit and bread industry.

As a blended coffee drink.

Attractive coffee alternative in recipes.

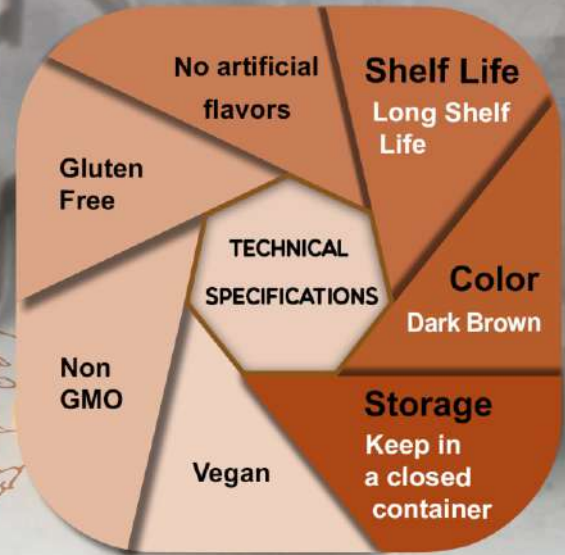

## NUTRITIONAL VALUE & BENEFITS

- A natural source of fiber, phosphorus, zinc, potassium, magnesium, calcium, and iron.
- Rich in antioxidants, polyphenols and flavonoids
- Reducing incidence of cardiovascular diseases
- Strengthening the immune system and reducing the risk of chronic diseases

## PACKING

The packing weight and design would be according to customer's demand.
